FLERTEX, FRICTION MATERIALS

Founded over 60 years ago, FLERTEX is today the only French independent manufacturer with both organic and sintered materials for railway, aerospace and industrial applications.

AEROSPACE PRODUCTS

Our friction materials are designed and produced in variety of shapes and sizes such as rings, discs, rectangles, etc. They are fitted to a wide range of applications such as the aircraft disc brakes in the landing gear. Such prestigious references are the result of our extensive experience and our ability to offer technically advanced products.

RAILWAY PRODUCTS

FLERTEX and FLERTEX SINTER are the leading French manufacturers of composite and sintered disc brake pads and brake shoes for Railway applications. Our products are fitted to a wide range of applications from trams and metros to high speed trains.

INDUSTRIAL PRODUCTS

Our linings are tailor-made to specifically meet the requirements of our customers. They are fitted to the brake and clutch assemblies on a variety of applications such as: marine equipments, wind turbines, construction equipments, cables, elevators, agricultural machinery, brake motors, industrial presses, etc.
